

5 questions to ask before **deploying** an **ERP / CRM** internationally

1

Do your subsidiaries share a common process vision?

An international deployment requires a common process vision to ensure consistency across the group.

2

Do you comply with local rules without losing group consistency?

Each country has its own accounting, tax and regulatory rules that the ERP/CRM must integrate to ensure compliance.

3

Is your system architecture consistent at group level?

Without a consistent system, subsidiaries work differently and information becomes difficult to share and manage.

4

Are your local teams fully involved in the project?

User adoption is a key factor in the success of an international project.

5

Does your ERP/CRM support your growth strategy?

The solution must be able to evolve to integrate new subsidiaries and support the group's growth.
